2.2 Login	4
2.3 Connect with Device	5
2.4 APP Main Interface	5
2.5 Other Interface	8

1 Introduction

This BlueTooth APP can be operated by both Android and IOS. It establish a BlueTooth connection between your smart phone and the battery, usages includes below: managing the battery pack, gathering the data and displaying them, conducting modifications on settings.

BlueTooth APP can achieve below functions:

- 1) Display the basic data of battery pack
- 2) Modifying the communication between BMS and inverter
- 3) Setting Alert Parameters and Switch on/off
- 4) Support Single and Parallel operation
- 5) Shift between Chinese and English

1.1 Application

This guide book fits below BMS:

- EMU1101 V15 (24V~48V)
- EMU1101 V16 (24V~48V)
- EMU1203 (24V~48V)

1.2 User

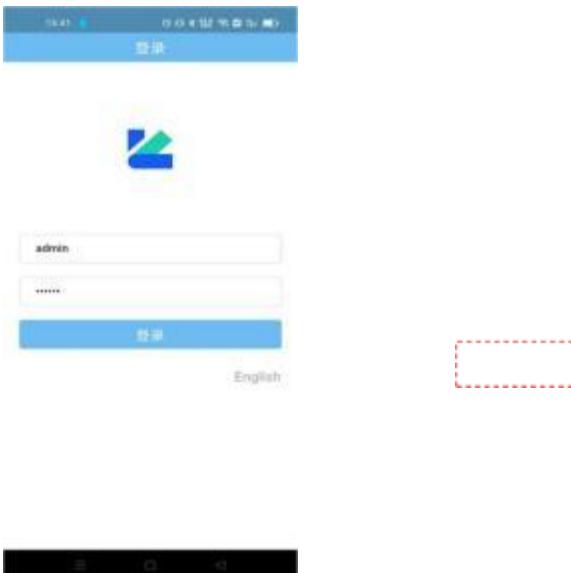

This manual book is for every users of Apexium BMS.

2 Operation

2.1 APK APP Download

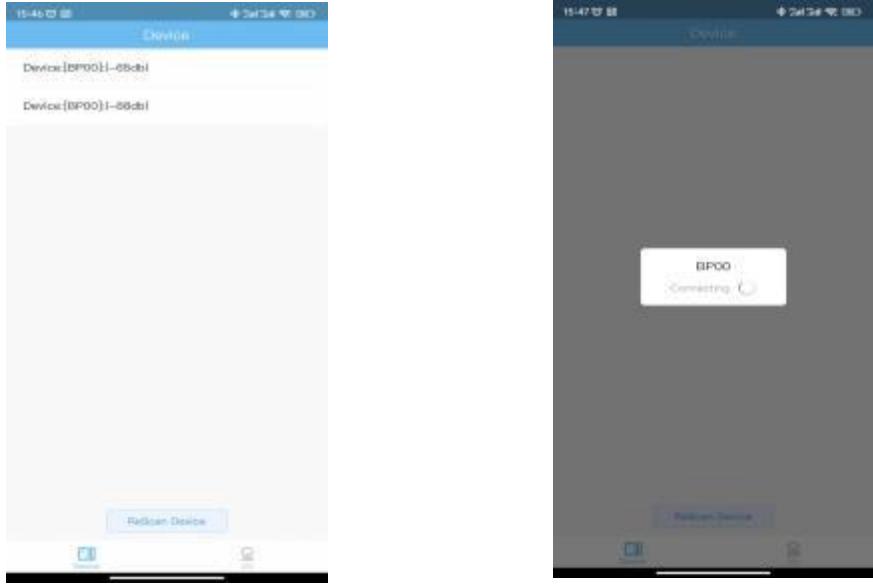

Android	<p>https://www.pgyer.com/1a8ce42e6c1a9f2d37dcaa6a790e40c2 Visit this netpage, scan the QR code.</p>
QR code	 <p>Download the apk and install on cell phone</p>
Latest version	V1.0.17
ISO	Search' EN BMS' in APP stores(notice the blank)

2.2 Login

Notice	<p>1、click the APP icon twice to start it. 2、Account:admin password: 111111 3、Click ‘ Login ’ Step1~3 see 2.2.1 4、click “ English ” to switch to English</p>
Login Interface	 <p>2.2.1</p>  <p>2.2.2</p>

2.3 Interface introduction

Tips	<p>1、see 2.3.1, after login in, the name of your device will be displayed on the device' interface.</p> <ul style="list-style-type: none"> - Single Operation: Displays BP00 - Parallel Operation: <p>2、See 2.3.2, click 'BP00' to connect</p> <p>3、BlueTooth signal can be unstable, please click 'search for device again' .</p>
Connection Interface	 <p>2.3.1</p> <p>2.3.2</p>

2.4 APP Main InterfaceAPP

Tips	<p>1、Main Interface can display information of single operation and parallel operation</p> <p>2、Single mode can switch: BP00 (master)、BP01~BP15 (slave); status bar 6 displays 'parallel-BP XX'</p> <p>3、In parallel mode, status bar 6 displays 'parallel-parallel'</p> <p>4、In parallel mode, status bar 1~4 displays the summery of data, bar 5 displays the communication type between master machine BP00 and inverter, bar 6 displays only the condition of parallel, other settings are forbidden.</p> <p>5、In single mode, status bar 2~5 displays the data of the selected machine, bar 6 displays the number of selected machine, 'Device Specification' , 'Configuration Parameter' , 'Switch Setting' . 'Configuration Parameter' and 'Switch Setting' can be viewed and modified.</p>
------	--

Main interface

2.4.1

Status bar 1: Displays the number of batteries in series, SOC, voltage, current, remained capacity, working condition(charging/discharging/stand-by-time)

Status bar 2: Alert and Protection statistics, click to view specifications. Alert: see 2.4.2
Protection: see 2.4.3. Click 'Alert Specification- Protection Specification' to view more data, like when did the event happen.

Status bar 3: Basic information. Displays single machine info in Single mode, summary info in Parallel mode

Status bar 4: Inverter Connection Protocol and Setting-CAN: Support 6 types essential options and 10 types of protocols-485: Support 5 types of RS485 protocols

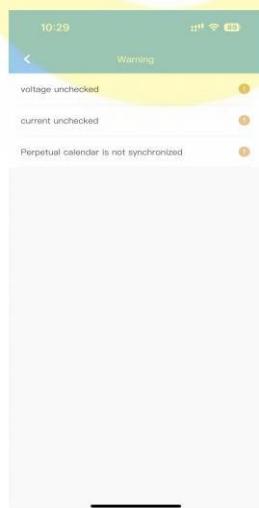

Status bar 5: Displays Parallel/Single condition,shift master and slaves, see 2.4.4.

Device details: Can show specification of battery pack in Single mode (high light) Click to view specification, see 2.4.5

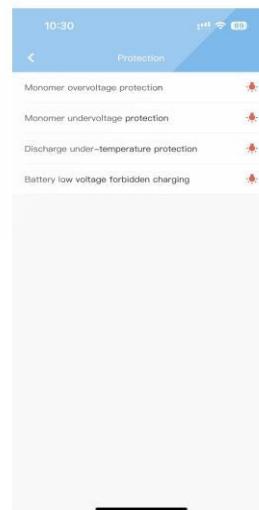

Configuration Parameter: Can display and configurate the parameters of battery pack in Single mode (high light). Click to view specification, see 2.4.6

Switch(on/off): Can switch the battery pack on and off in Single mode (high light). Click to view specification, see 2.4.7

图 2.4.4

2.4.2

2.4.3

图 2.4.5

1. Show highest/lowest voltage of all cells, voltage of each cell.
2. Show highest/lowest temperature of all cells, temperature of each cell.
3. Display
Show Manufacturer Information: CAN or RS485 communication, protocol with inverter.
Component Type: type of client's panel.
Software Version: version of BMS software.
Protocol Version: version of communication protocol between BMS and APP.

2.4.6-1

1. In Single mode (see 2.4.4, shift between Single mode and Parallel mode), click 'Edit' (see 2.4.6-1), enter password 111111 (see 2.4.6-2) and set the configuration parameter, then click 'Save'.
2. After clicking 'Save', system will notice 'Confirm Modification?', your modification will be conducted by BMS after your confirm.

2.4.6-2

2.4.6-3

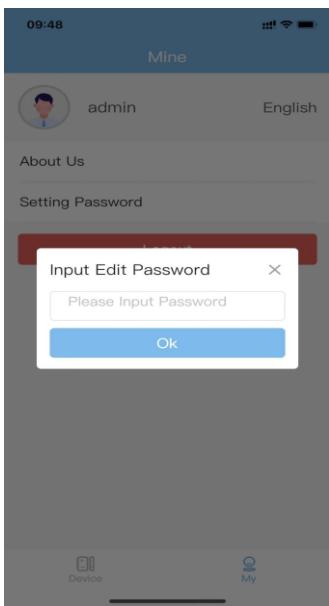

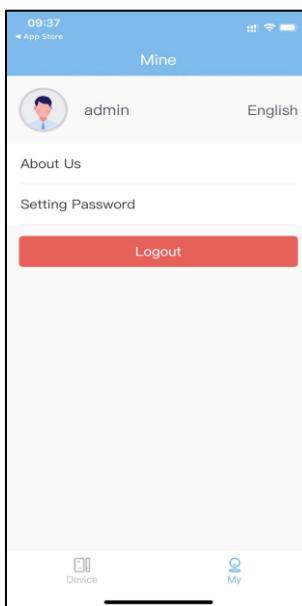

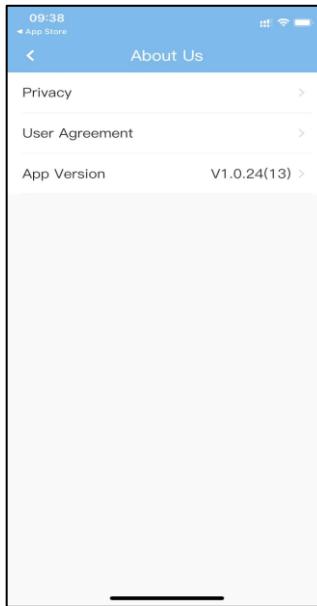

1. In Single mode (see 2.4.4, shift between Single mode and Parallel mode), click 'Edit' (see 2.4.7-1), enter password 111111 (see 2.4.7-2) and set the configuration parameter, then click 'Save' (see 2.4.7-3)

2. After clicking 'OK', system will notice 'Confirm Modification?', your modification will be conducted by BMS after your confirm.

2.4.7-1
2.4.7-2
2.4.7-3

2.5 Other Interface

Tips	1. 'About Us' , 'Setting Password' and 'Logout' , see 2.5.1 2. Click "About Us" , like 2.5.2 3. Click "Setting" Password' to change your password. Click 'OK' to save your settings.
